Skills

- Experienced in prototyping and shipping games for PC, VR, and location based installations.
 - Skilled in cross-discipline collaboration, development, and communication.
 - Game Engines: Unreal Engine 4 and 5, Unity
 - Programming Languages: C#, C++
 - Other Software: Visual Studio, Rider, Jira, Trello, Perforce, SVN, Git
-

Work Experience

Brass Lion Entertainment - Gameplay Programmer, Remote

January 2024 - Present

Games: *Wu-Tang: Rise of the Deceiver*

- Implemented multiplayer combat systems in UE5 using GAS, enhanced input, motion warping, and animation systems with a focus on player abilities.
- Developed a hit resolution system to process and apply on hit effects.
- Collaborated closely with designers and artists to develop narratively thematic abilities.
- Dedicated time to squash bugs, refactor, and stabilize game architecture.
- Researched and documented contemporary game dev practices to guide feature development.
- Mentored designers in UE Blueprints and debugging.
- Advocated for cultural authenticity in narrative and gameplay decisions.

Schell Games - Advanced Engineer, Pittsburgh, PA

June 2018 - December 2023

Games: *Silent Slayer: Vault of the Vampire*, *Lost Recipes*, *Deep Time Detectives*, *Mission: It's Complicated*

- Collaborate closely with designers and artists to develop gameplay mechanics and implementation pipelines that prioritize the target gameplay experience:
 - Developed mesh generation tools with custom precise collision for rapid prototyping.
 - Built encounter architecture and puzzle interactions with real world design affordances.
 - Implemented and maintained complex and robust simulations of cooking mechanics using dynamic mesh generation, physics, and vertex painting.
 - Created friendly character AI using Unreal Engine's AI systems including AI controllers, animation blueprints, and behavior trees.
 - Led multidisciplinary teams in blue sky concepting and prototyping to develop new IP.
 - Worked with clients to build bespoke experiences on custom hardware.
 - Supported and maintained physical mockups for development and playtesting.
 - Documented technical systems with reference and user manuals.
 - Mentored engineers and designers to improve technical and soft skills through code reviews, pair programming, and task breakdowns.
-

Education

Carnegie Mellon University - Pittsburgh, PA

May 2018

B.S. in Computer Science

Double Major in Human Computer Interaction, Minor in Game Design
